John Landers

MI 449 Final Project

Aviation Connect, an idea originally thought of in MI 349, is a hub for all aviation enthusiasts to share news and information, photos, videos, and to discuss various topics within the aviation industry. The aviation market and industry has been in the spotlight lately, with various aircraft issues plaguing the reputations of flying. Many travelers and enthusiasts have lots to say and are also curious to learn more. For those who choose to avoid the debates or technical discussions, sharing photos and videos would be a better route, and it is possible on Aviation Connect as well. No matter what side of aviation users prefer, Aviation Connect is the hub for everyone to come together!
